

Applied to agricultural greenhouses

WIGGLE WIRE

100% polyester material

WIGGLE WIRE

High strength, durability, high UV resistance,
no damage to the plastic film!

The wiggle wire made of 100% polyester is very light!!

Characteristics:

Point 1

Due to the 100% polyester, it will not rust and can be used for many years!

The wiggle wire made of special polyester material is resistant to corrosion, acid and sulfur, etc.; it will not be deformed when exposed to the sun.

Point 2

Because it is a plastic product, it can be easily cut to an appropriate length!

Point 3

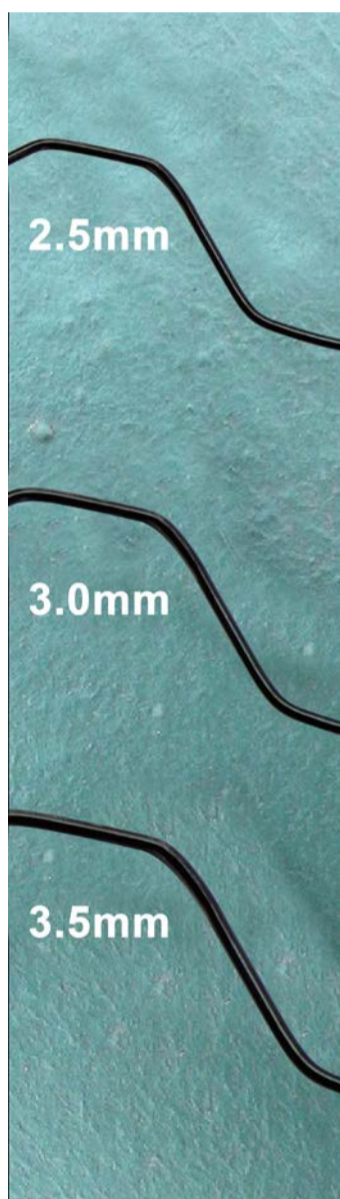

Installation at both ends of the zigzag wire is effortless and easy to operate!

Point 4

Wiggle wire has an arc-shaped concave-convex groove in the transverse direction, which is convenient for pressing and installing!

Point 5

Women can also install it effortlessly!

In the past

Difficulty cutting both ends (easy to lift up and scratch the plastic film)

Now — JUDIN

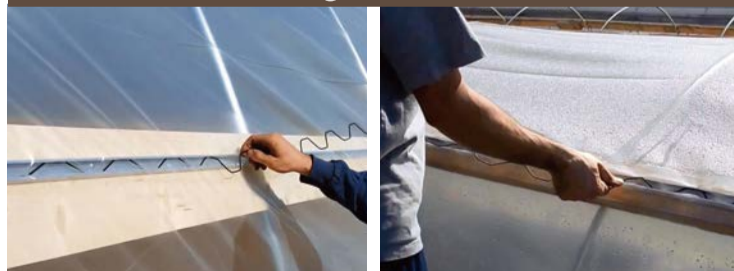

Installation and removal is simple and fast
